# Prophet Yunus (as)

**Write numbers from (1-9) to put the story in the correct order**

Prophet Yunus (as)  
left the city

A terrible storm rose  
in the sea

A big fish swallowed  
Prophet Yunus (as)

Prophet Yunus (as)  
made dua to Allah

The sailors cast lots,  
Prophet Yunus (as)  
jumped into the sea

The people of Nineveh  
rejected Prophet  
Yunus's (as) message

Prophet Yunus (as)  
boarded a ship to  
travel far away from  
Nineveh.

Allah sent Prophet  
Yunus (as) to guide  
the people of Nineveh

Allah saved Prophet  
Yunus (as)

# The Dua of Prophet Yunus (as)

Color in the beautiful dua of Prophet Yunus (as) and memorize it. We can recite it when we want to ask Allah for forgiveness.

لَا إِلَهَ إِلَّا أَنْتَ  
سُبْحَانَكَ إِنِّي كُنْتُ  
مِنَ الظَّالِمِينَ

Transliteration: La ilaha illa anta subhanaka innee kuntu mina adh dhalimeen.

Translation: There is no God but You. Glory be to You. I have certainly done wrong.

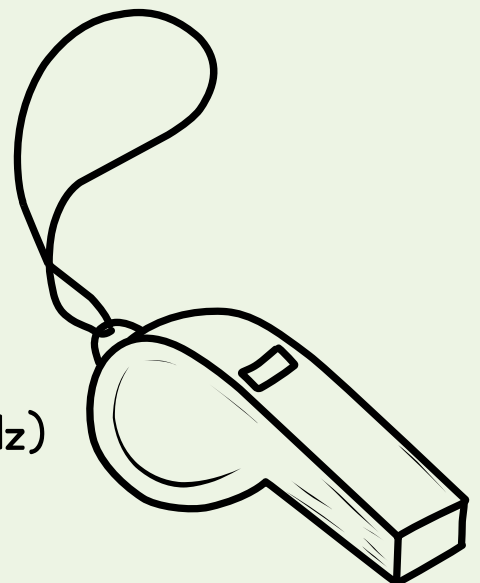

# Allah is As Samee'

Did you know that the normal hearing range for humans is 0-130 decibels (dB) or 20 to 20,000 hertz (Hz)? The unit 'decibels' is used to measure how loud a sound is, and the unit 'hertz' is used to measure the pitch or frequency of sound. This means we can't hear every sound. Some animals can hear sounds that are too quiet or too high-pitched for human ears!

Allah's hearing is perfect and unlimited. Unlike humans and animals who need sound waves to travel through air or water, Allah doesn't need any medium. He hears everything everywhere at the same time!

**From the list below, tick the sounds that humans can hear:**

- A leaf falling to the ground (0-10 dB)
- A whisper from 3 feet away (20-30 dB)
- Dog whistle (23,000-54,000 Hz)
- A ticking watch (20 dB)
- Classroom noise (70-80 dB)
- Bat echolocation calls (20,000-200,000 Hz)
- Cat purring (25-30 dB)

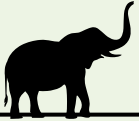

- Ant footsteps
- Lawn mower (90 dB)
- Elephant's infra-sound rumbles (5-18 Hz)
- Mouse squeaks (30,000-90,000 Hz)
- A refrigerator humming (40 dB)
- Thunder nearby (120 dB)

Look at the chart comparing the hearing ranges of different animals given on the next page. Different creatures hear different ranges of sounds because Allah has given each exactly what they need to survive and thrive in their environments. This perfect design is one of the countless signs of Allah's wisdom and mercy in creation.

Think about this: if humans could detect every sound—like the movement of blood cells in our bodies or the constant flow of air molecules—our minds would be overwhelmed by this constant noise. The limitations of our hearing are actually a blessing from Allah, allowing us to focus on the sounds that matter most for our daily lives.

Creation		Hearing range in Hertz
Humans		20-20,000
Bats		2000-110,000
Elephants		16-12,000
Porpoise		75-150,000
Dog		67-45,000
Cat		45-64,000
Horse		55-33,500
Chicken		125-2,000
Parakeet		200-8,500
Killer Whale		800-13,500

AS SAMEE HEARS EVERYTHING!
